(C)	Solvency Margin Ratio [(A) / {(B) × 1/2 }] × 100	1,044.6%	809.1%	887.9%

- 1. The above figures are calculated based on Articles 86 and 87 of the Ordinance for Enforcement of the Insurance Business Law and the provisions of Notification 50 of the Ministry of Finance for 1996.
- "Capital and funds, etc." is the amount of total net assets minus planned outflows, valuation and translation adjustments and deferred assets.
- 2. Calculation of solvency margin ratios has changed from previous fiscal year due to revision in the Ordinance for Enforcement of the Insurance Business Law. Consequently, figures in "As of March 31, 2008" and "As of September 30, 2008" are calculated on the different basis from the basis of "As of September 30, 2007".
- < Solvency Margin Ratio >
- In addition to reserves to cover claims payments and payments for maturity refunds of saving type insurance policies, etc., it is necessary for insurance companies to maintain sufficient solvency in order to cover against risks which may exceed their usual estimates, i.e. the occurrence of major disasters, a big decline in value of assets held by insurance companies, etc.
- The solvency margin ratio (C), which is calculated in accordance with the Insurance Business Law, is the ratio of "solvency margin of insurance companies by means of their capital, reserves, etc." (total solvency margin: (A)) to "risks which will exceed their usual estimates" (total risks: (B)).
- "Risks which will exceed their usual estimates" (total risks: (B)) is composed of risks described below.
- <1> General insurance risk, third-sector insurance risk: Risks of occurrence of insurance claims in excess of normal expectations (excluding risks relating to major disasters).
- <2> Assumed interest risk: Risks of invested assets failing to yield assumed interest rates due to the aggravation of investment conditions than expected.
- <3> Asset management risk: Risks of retained securities and other assets fluctuating in prices in excess of expectations.
- <4> Business administration risk: Risks beyond normal expectations arising from business management. (That does not fall under other categories.)
- <5> Catastrophic risk: Risks of the occurrence of major catastrophic losses in excess of normal expectations. (risks such as the Great Kanto Earthquake or Isewan typhoon)
- "Solvency margin of insurance companies by means of their capital, reserves, etc." (Total solvency margin: (A)) is total net assets (excluding planned outflows), certain reserves (reserve for price fluctuation and catastrophic loss reserve, etc.) and parts of net unrealized gains/losses on real estate.
- The solvency margin ratio is one of the indicators for the regulatory authorities to supervise insurance companies. A ratio exceeding 200% indicates adequate ability to meet payments of insurance claims.

N	let income	44.6	(7.3%)	(57.0)	(227.6%)	

- The above forecast is based on information available as of the date of publication of this
 document or practical premise, the actual result may considerably differ due to various factors.
 Major premises are as follows:
 - Net premiums written and net claims paid are based on SJI's calculation reflected actual results and premium rating changes.
 - Net incurred losses by natural disasters are estimated at 8.0 billion yen (fire: 5.0 billion yen/ others: 3.0 billion yen) for the fiscal year ending March 31, 2009.
 - Due to the turbulence in the global financial markets after October 2008 and the prolonged and worsened of U.S. subprime crisis, the possibility of the occurrence of insured event on some of financial guarantee insurance policies in this fiscal year is increasing and SJI estimates additional loss reserve could be 70.0 billion yen.
 - Investment forecast is estimated with interest rates, exchange rates and stock prices of the end of October, 2008.
 - Interest and dividend income, realized gain and loss on sales of securities and devaluation loss on securities are estimated at 104.0 billion yen, 17.0 billion yen and 73.0 billion yen respectively.
- 2. "% increase (decrease)" of loss ratio, expense ratio and underwriting balance ratio represents the difference between previous fiscal year and this fiscal year.
