* The figures were disclosed on November 17, 2017. Ordinary income represents consolidated results for the previous fiscal year because forecasts weren't disclosed.

2. Main reasons for the revision

Ordinary income increased compared with the consolidated results for the previous fiscal year. The main reason for this increase was a recording of gains and losses, which arose from Sompo International Holdings Ltd. and its group insurance companies, etc, as net premium written in the consolidated financial statements of the Company from fiscal year ended March 31, 2018. Ordinary profit and net income attributable to shareholders of the parent decreased compared with the previous forecasts. The main reason for this decrease was an increase of net incurred loss compared with the previous forecasts.
