Sompo Holdings, as the holding company of all Group companies, considers continuous improvement of transparency and fairness of the Group’s corporate governance and fulfillment of corporate social

responsibility through business as essential for maintaining strong relations of trust with stakeholders. The Board of Directors has accordingly established this Policy to clarify basic policies regarding the overall vision for the governance structure and the development of governance framework. We continue to make efforts to enhance corporate governance in pursuit of the best corporate governance. Further information on the Group's Corporate Governance Policy may be viewed on the Company website at <https://www.sompo-hd.com/en/company/governance/overview/policies/>

Sompo Holdings, Inc. (hereinafter "the Company") has changed its governance structure to "Company with committees", effective June 2019, as part of efforts to strengthen corporate governance structure by separating management supervision from business execution in order to reinforce the supervisory function of the Board of Directors and to accelerate business execution by delegating substantial authorities from the Board of Directors to executive functions. The Company also established three committees; Nomination Committee, Audit Committee, and Compensation Committees and established governance structure that works to improve transparency and fairness. In addition, executive officers make executive decisions and perform duties on the matters delegated from the Board of Directors under the comprehensive supervision by the Group CEO and the Group COO, while business owner system and Group Chief Officer (hereinafter "Group CxO") system are in place to ensure agile and flexible decision-making and duty practice, with clearly defined authorities and responsibilities.

Additionally, the Board of Directors delegates executive decisions to Executive Officers in principle, as far as the laws permit, to further strengthen the supervisory function of the Board of Directors and accelerate business execution.

Additionally, the Company established the Global Executive Committee (hereinafter "Global ExCo"), which is, the highest executive committee and an advisory body to the Group CEO to discuss important matters that significantly impact management, such as Group management strategy and business executive policy. The Company also established Managerial Administrative Committee (hereinafter "MAC") as an advisory body to the Group COO to discuss important matters related to execution of business strategies and managerial administrative matters of the Company and Group companies.

(3) View on the Corporate Governance Code

We understand that the Corporate Governance Code (the "Code") is established in order to contribute to company's sustainable corporate growth and the increase of corporate value in the medium term by improving the system for transparent, fair, prompt, and decisive decision-making based on the perspective of all stakeholders, including the company's shareholders, customers, employees and local communities.

In the spirit of the Code, the Group constantly seeks to improve its corporate governance to promote the Group's ongoing growth and the enhancement of corporate value in the medium term.

[Reasons for Non-compliance with the Principles of the Corporate Governance Code]

The Group complies with all principles of the Code revised in June 2021.

[Disclosure Based on the Principles of the Corporate Governance Code]

Principle 1.3 Basic Policy of Capital Policy

- Our capital policy is based on the Enterprise Risk Management (ERM) framework. Its basic policy is to maintain robust financial health by appropriately controlling the balance of capital, risk, and return, while steadily improving capital efficiency to grow profits to a world-class level and achieve an adjusted consolidated ROE of 10% or higher, as well as ensuring attractive shareholder returns (dividends paid + share buybacks) commensurate with both profit and shareholder equity levels.
- To sustainably boost the Group's capital efficiency, we formulated "SOMPO Group's Risk Appetite Statement" to clarify the Group's mid-term risk-taking policy and direction. This Statement indicates the risk-taking approach for each risk category by taking into consideration return on risks.

Based on this, we will continue to reduce strategic holding stocks with low capital efficiency and domestic interest rate risk by strengthening ALM, and use the capital and cash flow generated to invest in growth areas with high capital efficiency.

By reviewing and advancing these initiatives one by one, we aim to achieve our mid-term goals of expanding adjusted consolidated profit to ¥300.0 billion or more and improving adjusted consolidated ROE to 10% or higher by FY 2023, the final year of our Mid-Term Management Plan.

The target for adjusted consolidated ROE was set based on our cost of capital of 7% and the average level of our global peers, as estimated by CAPM (Capital Asset Pricing Model) .

- To maintain robust financial health, we manage capital based on the Economic Solvency Ratio (ESR), which compares capital and risk based on economic value. In capital management, we set a target capital level (ESR: 200% to 270%) and risk tolerance as a guide to appropriate capital levels from the perspective of financial soundness and capital efficiency, and implement appropriate capital policies according to the ESR target levels. In calculating ESR, we take into account recent regulatory trends and disclosures by domestic and overseas insurance companies. Additionally, in order to enhance global comparability, we have adopted capital management methods that comply with international capital regulations and are working to maintain financial soundness.

- We aim to provide attractive shareholder returns while taking into consideration our financial soundness and the business environment, with the basic policy of continuously increasing dividends through sustainable profit growth as well as maintaining the option of flexibly executing share buybacks depending on share price and capital availability.

Under the current Mid-Term Management Plan, we set a basic shareholder return rate equivalent to 50% of adjusted consolidated profit and will steadily increase the total amount of returns (dividends paid + share buybacks) through profit growth. We will also provide supplementary returns depending on financial performance, the financial market environment, and capital conditions. In addition, our basic policy is to increase dividends in line with profit growth, and to raise the ratio of dividends to total payout.

Principle 1.4 Cross-Shareholdings

Policy on Cross-Shareholdings

- Cross-Shareholdings refers to shares held by the Company and its domestic subsidiaries for purposes other than net investment, excluding shares of its subsidiaries and affiliates. As part of its capital policy, our group allocates part of the capital buffer generated by the continued reduction of cross-shareholdings to growth investments such as M & As in order to ensure financial soundness and improve capital efficiency. In the medium term, the Company aims to reduce the level of holdings to no more than 20% of its adjusted consolidated net assets by the end of FY2030, and plans will be in place to achieve this.

- The Company's consolidated subsidiary Sompo Japan engages in strategic shareholdings for the purposes of gaining return in the form of dividend income and share price increase, fortifying relations with insurance sales channels and business partners, and maintaining and strengthening insurance transactions with corporate clients.

The Company plans to reduce strategic shareholdings by 150.0 billion yen in the three years of the current Mid-term Management Plan from FY2021 to FY2023. The Company has achieved a cumulative reduction of 120.4 billion yen from FY2021 to FY2022, and plans to achieve a further reduction of 70.0 billion yen in FY2023, which is expected to be achievable.

-The Company and its domestic subsidiaries (excluding Sompo Japan) hold shares for the purpose of strengthening collaboration and relationships with companies with various advanced technologies and business models, including digital technologies, in order to realize "A Theme Park for Security, Health & Wellbeing".

Examination by the Board of Directors

-The Board of Directors annually examines the rationale for continuing to maintain our group's cross-shareholdings of listed companies. In the examination, it reviews shares held by Sompo Japan from the view of contribution to profit such as insurance profits and dividends, and the formation of unrealized gains from value appreciation, as well as the future use of the shares based on the cross-shareholding objectives such as supporting insurance transactions and strengthening alliances. In reviewing profit contribution, the Company sets quantitative risk and return assessment benchmarks for the associated insurance transactions and share values.

-Shares held by domestic subsidiaries (excluding the Company and Sompo Japan) are comprehensively considered not only long-term profitability as stock but also the degree of contribution to our group strategy, such as collaboration (business alliances) with investees, and the state of achievements in business alliances.

Exercising voting rights for cross-shareholdings

Upon comprehensive consideration of the impact on the overall activity mentioned above of the Company to fulfill its stewardship responsibilities, the Company does not disclose voting records on an individual agenda item basis.

The purpose of promoting D&I is to facilitate sustainable growth of Sompo Group and enhance corporate value by bringing forth innovation and improving employee happiness and motivation.

To fulfill Sompo Group's Purpose of serving as "A Theme Park for Security, Health & Wellbeing", we need to welcome the good crashes that happen when a diverse set of people come together, and build on that to innovate and find new value. It is important to achieve true D&I and tie it into major innovation under the idea that each and every employee at the workplace, regardless of gender, disability, nationality, age, etc., can leverage their individual talents and strengths, take advantage of change, and create new value.

<Measures to ensure diversity>

The Diversity & Inclusion Promotion Headquarter has been established to promote Diversity & Inclusion as defined in the Human Resources Core Values. With the Diversity and Inclusion Promotion Headquarter as the driving force, our group promotes diversity throughout the Group, reflecting the perspectives of diverse human resources in the various services it provides, leading to the creation of innovation, and promoting

sustainable growth and enhancing corporate value through "Improving employee happiness and motivation" through the creation of a culture in which employees can work and feel that they are contributing to the team by demonstrating their individuality and strengths. At our group, we are promoting initiatives to make the most of the diversity of each and every employee. We also hold "One on One" training sessions at each group company for management to enable each employee to face "My Purpose" and pursue a self-driven work style.

We are also working hard to promote those employees to executive and managerial position, and the Succession Plan for the key positions of the Group's each domestic and overseas business lines, including the Group CEO, sets a numerical target of 40% of candidates being women. As of July 1, 2022, there are four female officers (3 Outside Directors and 1 Executive Officer) at our company and four female officers (2 Directors, 1 Auditor, 1 Executive Officer) in Sampo Japan. ☐ Appointment of Foreign Nationals and External Personnel

Our group has formed a diverse workforce, including foreign nationals, through the development of its overseas insurance business. In addition, we are working to further promote D&I and globalize our business by launching programs to actively recruit personnel from overseas group companies, mainly in Sampo Japan. In April 2020, our company introduced a job-based personnel system for external personnel. This system creates positions based on the content of duties (jobs), and hires and assigns personnel with the necessary experience and skills. By expanding the number of job-based personnel through external career recruitment, etc., this system contributes to building a human resource group with diverse experience and skills.

In addition, we actively promote highly specialized personnel to key positions such as directors, general managers, and specialists. We are working to ensure diversity by promoting strategic personnel assignments that are not restricted to gender or nationality.

In our company, 13.6% of executive officers and senior vice presidents are foreign nationals. As of March 31, 2022, the ratio of foreign nationals employed in our company is 4.3%, while that of external personnel is 17.4%. Our group hires people with disabilities all over the country, and is making efforts to create workplaces where they can play an active role and secure employment. Sampo Japan Insurance Inc. has placed vocational life consultants for people with disabilities throughout Japan, and has established a system to provide support for creating comfortable workplaces. SOMPO Challenged Inc., a special-purpose subsidiary established in April 2018, also plays a role in driving the employment and activities of people with disabilities in the Sampo Group.

At the Company, integrated management of preliminary briefing sessions and the Board of Directors ensures efficient and fruitful discussions and that the views and perspectives of outside directors are directly reflected in the Board of Directors.

c) Activation of Discussions by Statutory Committees

The Company adopted a Company with Committees in June 2019 in order to strengthen management supervision and speed up business execution. Under this structure, discussions are deepened in order for each organization to perform its roles more faithfully and fulfill its accountability to stakeholders, including intensive deliberations on important management themes at the Board of Directors, appointment and remuneration decisions of officers and supervision of the legality and appropriateness of execution of duties at the Nomination, Audit, and Compensation Committees.

d) Measures for the Exercise of Functions of Supervision of the Board of Directors

In order to maintain a sense of distance between the Board of Directors and the executive departments and to maintain sufficient communication even after the delegation of authority due to adoption of Committees as above, the Company will proactively take measures that contribute to the exercise of functions of supervision, such as strengthening information coordination for directors to grasp the status of execution.

Concretely, Business Owners and Group Chief Officers reports on the current status of their business execution at the Board of Directors; directors have accesses to the Global Executive Committee and the Managerial Administrative Committee, which are the meeting body of the executive officers; the information sharing meetings are held in which timely information on execution is reported to outside directors without being limited to matters to be discussed by the Board of Director; the free discussions are held regarding execution status and information from the business owner's management perspective; and the outside directors exchange opinions with the representative executive officers.

In FY 2021, we further enhanced the frequency and content of Information Sharing Meetings, which provide outside directors with timely information on the execution of the important themes mentioned in 1. d) above. In addition, in the same fiscal year, the Company started a free discussion on executive information from the perspective of business owners without being limited to matters to be discussed by the Board of Director, as well as reports by executive officers and discussions by members of the Board of Directors from the stage prior to reaching a resolution. In the previous fiscal year's assessment, the enhancement of more realistic information sharing and communication between directors and executive officers, especially with each

business owner, was identified as an urgent issue in terms of awareness of issues in operations in response to the novel coronavirus. In the latest survey, it was highly evaluated that intensive free discussion between executive officers and directors for each business was very effective.

In addition, with regard to the above themes, there was a multifaceted discussion on each of the perspectives mentioned above, and there was an opinion that there has been significant progress in the desired direction. In particular, with regard to Purpose Management and engagement of employees, there were active discussions and reports of actions, which deepened the discussion.

In general, discussions are conducted based on a sufficient awareness of issues as the Board of Directors. Executives are also considered and implemented based on this, and it is evaluated that a virtuous circle has been created in which discussions are held again at the Board of Directors.

The Company's directors have commented that the Global Executive Committee which is the highest decision-making body for execution and other bodies share a common understanding of the Company's medium-term management plan, which forms the basis of management strategy, and the realization of "A Theme Park for Security, Health & Wellbeing", and that this is a result of the functioning of an advanced governance system and the ongoing active deliberation of these matters.

In FY2021, as the first year of the Mid-Term Management Plan, open and frank discussions were held on specific initiatives related to basic strategies, such as "pursuing scale and diversification" "creation of new customer value", and "new work style" in order to achieve sustainable growth through the realization of "SOMPO's Purpose" and the diverse insights of each director were reflected.

On the other hand, opinions were expressed that regarding the construction of a Real Data Platform (RDP), discussions should be deepened by sharing materials that give a sense of presence based on the situation on the ground, that the effectiveness of Purpose management should be measured, and that opportunities to share the opinions of various stakeholders with the Board of Directors should be increased.

3. Initiatives in FY 2022

[Auditing Structure]

Appointment of Directors and/or Staff to Support the Audit Committee	Appointed
--	-----------

Matters Related to the Independence of Such Directors and/or Staff from Executive Officers (Shikkoyaku)

To ensure the effectiveness of audits by the Audit Committee, the Company has established the Audit Committee Office as an organization dedicated to assisting the duties of the Audit Committee.

Cooperation among Audit Committee, Accounting Auditors and Internal Audit Departments

The Company has changed its governance structure to "Company with committees", effective June 2019, as a part of efforts to strengthen corporate governance structure.

The Internal Audit Department discusses with the Audit Committee when the department makes internal audit plans. The results of audits by the Internal Audit Department are all reported to the Audit Committee. The Audit Committee requests the Internal Audit Department to conduct investigations as necessary, and uses the results of these investigations for audit by the Audit Committee. In addition, the Internal Audit Department works closely with the Accounting Auditor and regularly exchanges opinions.

The Audit Committee formulates audit plans and conducts audits. It strives to implement efficient audits by requesting General Manager of Internal Audit Department to attend the Audit Committee and regularly exchanging opinions and information with the Internal Audit Department. It also deepens mutual understanding with the accounting auditors about the content of audits, including risk recognition and audit plans, and it exchanges opinions with the Internal Audit Department upon receiving explanations on the implementation status of audits. Also, the quality of the audits by the accounting auditors is maintained by consenting to the decision for the accounting auditors' audit fee after verifying that adequate time will be able to be provided for the audits.

Steps have also been taken to provide a supportive environment for the accounting auditor, including enabling access to senior management personnel such as the Representative Executive Officer and promoting collaboration with the internal audit and other departments.

When the Audit Committee receives reports on the results of audits from the accounting auditor, the Internal Audit Department attends so that the three parties could have the same understanding.

During the audits and other activities, the internal audit department, the Audit Committee and accounting auditors exchange opinions and information with the internal control departments (corporate management / accounting). The internal control department uses the results of the opinion and information exchanges by three audit parties to strengthen the internal controls.

Policy on Determining Remuneration Amounts
and Calculation Methods

Established

Disclosure of Policy on Determining Remuneration Amounts and Calculation Methods

1. Sampo Holdings' Executive Compensation Structure

The Company regards its executive compensation structure as an important aspect of corporate governance. The executive compensation structure has been configured with the aim of increasing corporate value and sharing interests with shareholders. The aforementioned structure is based on the basic policies outlined below, and has been designed from an objective perspective by the Compensation Committee, which is chaired by an outside director.

The Company's Policies on Decisions Pertaining to Executive Compensation describes the Basic Policies on Executive Compensation, the composition of compensation and how it is determined for each position, and the details of each type of compensation.

2. Overview of Executive Compensation Structure

The Company considers the current Mid-Term Management Plan as an opportunity for realizing transformation of each business and the entire Group. Executive compensation linked to the Company's performance is recognized as an important facet of corporate governance underpinning this transformation initiative.

The Company, based on the principle of being mission-driven (Stay engaged with a sense of mission; take ownership at work) and results-oriented, is of the opinion that each executive officer should demonstrate and act in accordance with their own duties and mission. Compensation for these executive officers is not a fixed amount based on their duties or position, but decided in accordance with the magnitude of the mission they are undertaking for the future and the outcome of their efforts. The structure for executive compensation was designed with this philosophy in mind.

(1) Decision-making process for total compensation packages

The Company sets compensation levels on an individual basis with consideration made to the magnitude of the mission assigned to each executive officer and their own personal performance. This is in contrast to an approach whereby compensation is determined according to a traditional compensation table for each executive rank.

(2) Composition of executive compensation

Executive officer compensation consists of a fixed component (base salary) based on the duties and responsibilities of each executive officer and a variable component linked to performance. Variable compensation comprises an annual bonus, which is compensation linked to short-term performance paid out on a fiscal-year basis in accordance with performance during each year, and a stock-linked compensation system (Phantom Stock) that provides the same economic value as cash stock in order to motivate executives to sustainably increase our company's corporate value and to promote value sharing between executives and shareholders. This composition is designed to motivate executive officers to make decisions based on longer-term earnings with a greater awareness of the share price, instead of focusing solely on a single fiscal year.

(3) Concepts on each of the remuneration elements and calculation method

■ Fixed Compensation (Base Salary)

The Company sets fixed compensation (base salary) in accordance with the responsibilities of the post assigned to each executive officer, and paid in equal amounts each month, in principle.

The amount of fixed compensation (base salary) is set at a level deemed fair in light of prevailing compensation levels on the market, referring to a survey of executive compensation conducted by a third-party compensation consulting firm, with a standard amount for the total compensation package based on the
