Notes)

1. Annualized premiums are calculated by using multipliers for various premium payment terms to the premium per payment. In single premium contracts, the amount is calculated by dividing the premium by the duration of the policy.

2. Annualized premiums for medical and survival benefits include (a) premium related to medical benefits such as hospitalization and surgery benefits, (b) premium related to survival benefits such as specific illness and nursing benefits, and (c) premium related to premium waiver benefits, in which disability cause is excluded but causes such as specific illness and nursing care are included.

Notes)

1. The above amounts and figures are calculated based on provisions of Articles 86 and 87 of the Ordinance for Enforcement of the Insurance Business Act and Public Notice No. 50 of the Ministry of Finance (1996).

2. Guaranteed minimum benefit risk is calculated by using the standard method.

Supplementary Explanation

< Calculation of ratios, etc. >

 Underwriting profit = Underwriting income - Underwriting expenses - Operating, general and administrative expenses related to underwriting + Other income and expenses*

*Other income and expenses include, but not limited to, income tax expenses for compulsory automobile liability insurance.

- Net loss ratio = (Net claims paid + Loss adjustment expenses) / Net premiums written × 100
- Net operating expenses ratio = (Net commissions and brokerage fees + Operating, general and administrative expenses related to underwriting) / Net premiums written × 100
- Combined ratio = Net loss ratio + Net operating expenses ratio

< Non-consolidated solvency margin ratio >

• In addition to reserve to cover payments for claims, benefits and maturity refunds, etc., it is necessary for insurance companies to maintain sufficient solvency in order to cover against risks which exceed their normal estimates, i.e. occurrence of major catastrophes, fluctuation in mortality rate due to significant changes in key environmental factors and big decline in value of assets held by insurance companies.

• (C) Non-consolidated Solvency Margin Ratio, which is calculated in accordance with the Insurance Business Act, etc. is the ratio of "solvency margin of insurance companies by means of their capital, reserves, etc." ((A) Total Non-consolidated Solvency Margin) to "risks which exceed their normal estimates" ((B) Total Non-consolidated Risks).

• "Risks which exceed their normal estimates" are composed of risks described below.

<1>Underwriting risk, Underwriting risk for third-sector insurance products including accident, sickness and nursing-care insurance:

Risks of rate of occurrence of insurance claims, etc. in excess of normal estimates (excluding risks relating to major catastrophes)

<2> Guaranteed interest rate risk:

Risks of invested assets failing to yield assumed interest rates due to the aggravation of investment conditions

<3> Investment risk:

Risks of securities and other assets held fluctuating in prices in excess of normal estimates

<4> Business management risk:

Risks beyond normal estimates arising from business management that do not fall under other categories <5> Major catastrophe risk:

Risks of the occurrence of major catastrophic losses in excess of normal estimates (risks such as the Great Kanto Earthquake or Isewan Typhoon)

<6> Guaranteed minimum benefit risk:

Risks of special account assets fluctuating in prices in excess of normal estimates

• "Solvency margin of insurance companies by means of their capital, reserves, etc." (total non-consolidated solvency margin) is the sum of total net assets (excluding planned outflows), certain reserves (reserve for price fluctuation, contingency reserve and catastrophic loss reserve, etc.) and parts of unrealized gains and losses on land, etc.

• Solvency margin ratio is one of the indicators for the regulatory authorities to monitor financial soundness of insurance companies. Solvency margin ratio exceeding 200% would indicate adequate capability to meet payments of possible insurance claims and others.
