(Notes)

1. The figures shown are those disclosed on November 19, 2024, except for ordinary income. The figure shown for ordinary income is the consolidated result for the previous fiscal year.

2. The Company implemented a 3-for-1 common stock split on April 1, 2024. Net income per share is calculated assuming that the stock split was implemented at the beginning of the previous fiscal year.

2. Reasons for the variance

As for the consolidated financial results for the fiscal year ended March 31, 2025, ordinary income has increased by 10.5% year-on-year on a 8.8% or 326.1 billion yen rise in net premiums written, reflecting higher revenues in the domestic P&C insurance business and the overseas insurance business, and on a 33.8% or 200.5 billion yen rise in investment income, reflecting higher revenues in gains on sales of securities. Ordinary profit and net income attributable to shareholders of the parent have increased compared with the Company’s previous forecasts, mainly due to higher than anticipated results in the overseas insurance business.
